EDUCATION

Lords Institute of Engineering and Technology

Hyderabad, India

B.E. in Information Technology Expected Graduation, August 2027

- **Concentrations:** Full Stack Development/AI/MERN Stack
- **GPA:** 7.4/10
- **Related Coursework:** Data Structures and Algorithms, Object-Oriented Programming, Python Development

Achievements

Indian Journal of Technical Education (IJTE)

Published

19-June-2026

Paper: AI Powered Academic Evaluation

- Co-authored and published research on automated grading; architected a multimodal platform using **React, Flask**, and **LLMs**, integrating complex NLP pipelines to achieve **95.92%** processing accuracy and a **0.70-0.90** Pearson correlation, matching expert human reviewers.

Hyderabad

9-April-2026

HackForge 2.0 Hackathon

- Developed Aptivox, an AI-powered interview platform using **NLP, ML**, and real-time analytics; competed among **200+** teams and finished among top-performing participants, achieving **89%** reduction in hiring time and **92%** accuracy in candidate skill matching.

Technical Projects

Eco-Awareness AI Chatbot — Ignited Spectrum

- Engineered an AI-driven conversational agent utilizing Python and the **OpenAI GPT** API to deliver natural, context-aware interactions focused on environmental security.
- Secured **3rd place** among competing teams for technical innovation and user impact, successfully integrating sophisticated NLP pipelines to drive real-time user engagement.

Whiskerverse: API-Driven Data Aggregator

- Engineered an API-driven frontend architecture, efficiently orchestrating asynchronous data fetching from multiple endpoints to achieve a **First Contentful Paint (FCP)** under **1.2** seconds.
- Optimized main-thread execution to prevent UI blocking during heavy payload processing, ensuring a fluid, **jank-free** user experience while implementing skeleton loaders and graceful error fallbacks for delayed network responses.

EverBuy: React-Powered E-Commerce Platform

- Architected a hyper-optimized Single Page Application (SPA) using React 18 and Tailwind CSS, achieving a **95+ Lighthouse score** with dynamic routing and zero layout shift across all device breakpoints.
- Engineered a global state engine via Context API and local storage hydration, ensuring persistent cart functionality, **60 FPS** UI animations, and seamless deployment on Vercel.

Professional Experience

Data Research Analyst

Hyderabad

Nov 2024 - Jan 2025

- Conduct research and analyze large datasets to support data-driven decisions.
- Collect and validate data, ensuring accuracy and reliability.
- Develop visualizations and reports for effective communication of findings.
- Identify trends and provide actionable insights to stakeholders.

SKILLS

Programming Languages: C, Python, JavaScript

AI & Machine Learning: NLP, LLMs, Machine Learning, OpenAI GPT API

Frontend Development: HTML, CSS, React.js

Backend Development: Node.js, Express.js

Database Management: MongoDB, PostgreSQL

Tools & Technologies : POSTMAN, Git, GitHub, JWT, Recoil
